Extended high frequency response and super-cardioid pick-up pattern for higher signal output, cuts through high on-stage sound levels. Smooth warm tonal response and full dynamic range, with presence lift for vocal clarity and projection. Consistent on/off axis and proximity response maintain sound quality while moving, providing greater onstage freedom.

Full metal construction and extensive suspension and shock-mounting minimize handling noise and signal interference. High output performance microphone, offering power, clarity and projection (also available with a switch: e 845-S).

ARCHITECT'S SPECIFICATION

The high-performance lead vocal microphone shall be a dynamic super-cardioid type designed for rough stage use. The microphone shall have a rugged metal body and a shock-mounted capsule and shall include a hum compensating coil.

The frequency response shall be 40 Hz – 16,000 Hz and the sensitivity (free field, no load) shall be 1.8 mV/Pa at 1 kHz. The nominal impedance shall be 350 Ω , with a min. terminating impedance of 1 k Ω . The microphone shall provide a 3-pin XLR connector. Dimensions shall be 46 x 185 mm (1.81" x 7.28"). Weight without cable shall be 330 grams (11.64 oz).

The microphone shall be the Sennheiser e 845, the variant with a silent ON/OFF switch shall be the Sennheiser e 845-S.
